1. Claims 14-54 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in response filed November 3, 2003.

2. Applicant's election with traverse of GROUP I in the response filed November 3, 2003 is acknowledged. The traversal is on the ground(s) that there is no independent invention and that a serious burden on the examiner does not exist. This is not found persuasive because Although the invention has been filed in a single application the applicant has submitted independent claims that have been deemed patentability distinct in that one GROUP of claims do not conflict with each other if separately allowed. As for the serious burden on the examiner, it should be noted that the same is deemed to exist in that the GROUPS of claims would require a search in classes 210, 73 and 15. Which is not required for the elected.

The requirement is still deemed proper and is therefore made FINAL.

3. This application is in condition for allowance except for the presence of claims 14-54 drawn to an invention non-elected with traverse in response filed November 3, 2003. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Flynn, Koslow, Scales, Wilson, Bartos, Nobel, III, Verdegan et al., Hein et al., Peter et al., Suratt et al., and Betancourt, note the cleaning
